

CUSTOMER FEEDBACK SYSTEM

Trigger: New Feedback Submitted in Notion

The General Feedback Database includes the following fields:

- Customer Name, Email, Product, Feedback, Rating (1–5)

The automation triggers whenever a new item is added to this database.

Path A: Negative Feedback (Rating $\leq$ 2)

Action 1: Copy Feedback to Negative Feedback Database (Create New Database Item)

Copy the feedback from the General Feedback Database to the Negative Feedback Database, which includes:

- Fields: Customer Name, Email, Product, Feedback, Rating, and Status (set to "Under Review").

Action 2: Send Email to Customer

Send a message to the customer thanking them for their feedback and inviting them to schedule a call using a provided calendar link.

Action 3: Notify the Team in Slack

Send a Slack message to the team alerting them about the negative feedback and requesting immediate action.

Action 4: Calculate Follow-Up Deadline

Use Zapier Formatter to add 48 hours to the database item's creation time and format the date for clarity.

Action 5: Create Asana Task

Create a task with the following details:

- Task Name: Follow up on Customer Feedback: [Customer Name]
- Task Description: Include the feedback content provided by the customer.

Action 6: Update Status in Notion

Update the "Status" field in the Negative Feedback Database to "Under Review."

CUSTOMER FEEDBACK SYSTEM

Path B: Neutral Feedback (Rating = 3)

Action 1: Copy Feedback to Neutral Feedback Database

Copy the feedback from the General Feedback Database to the Neutral Feedback Database.

Action 2: Send Email to Customer

Send a message to the customer thanking them for their feedback and letting them know their insights are appreciated.

Action 3: Notify the Team in Slack

Send a Slack message to the team summarizing the neutral feedback and asking them to review and address the suggestions.

Path C: Positive Feedback (Rating ≥ 4)

Action 1: Copy Feedback to Positive Feedback Database

Copy the feedback from the General Feedback Database to the Positive Feedback Database.

Action 2: Send Email to Customer

Send a message to the customer thanking them for their positive feedback and including a promo code as a token of appreciation.

Action 3: Notify the Team in Slack

Send a Slack message to the team summarizing the positive feedback and mentioning that the customer has received a thank-you email with a promo code.

Action 4: Create Asana Task

Create a task with the following details:

- Task Name: Follow Up on Positive Feedback from [Customer Name]
- Task Description: Ensure the customer has received their thank-you email and promo code. Consider reaching out for a testimonial or case study.
